EDUCATION

Northeastern University, Boston, MA, USA *September 2022 - Present*
PhD in Computer Science / Personal Health Informatics

Khulna University of Engineering & Technology, Bangladesh *March 2016 - March 2020*
BS in Computer Science & Engineering

EXPERIENCE

Khoury College of Computer Sciences, Northeastern University *September 2022 - Present*
Graduate Research Assistant (PhD Candidate)

- Exploring how in-the-wild stress phenotypes influence stress recovery by applying Support Vector Regression (SVR) and K-means for Longitudinal Data (KML) to extract behavioral and passive-sensing phenotypes, reducing recovery prediction error by **29.4%**.
- Building interpretable stress prediction models by integrating behavioral rules from passive sensing data with physiological biomarkers derived from an Support Vector Model (SVM) from lab stressors with an AdaBoost model across temporal windows, achieving performance with ROC-AUC of **78.75%**.
- Conducted a controlled digital phenotyping stress study across research and consumer-grade wearables, applying SVM with RBF kernel and Random Forest under leave-one-subject-out validation where Garmin Forerunner 55s achieved highest performance, outperforming Empatica E4 by **6.2%**.
- Analyzed stress–sleep relationships using ANOVA and linear mixed effects model revealing greater multiday sleep efficiency variability among high-stress individuals, addressing gaps in capturing different social determinants in sleep analysis.

Samsung Research America *May 2024 – August 2024*
Data Science & Machine Learning Intern at Samsung Design Innovation Center

- Designed methods to aggregate and analyze unstructured response data for dyslexia support, using TextBlob for sentiment analysis and Term Frequency–Inverse Document Frequency (TF–IDF) vectorization for text feature extraction.
- Built a feed-forward neural network MLP model to predict personalized support needed for Dyslexic individuals with smartphones for developing a prototype with Streamlit framework.

Baylor College of Medicine, Rice University *April 2021 - December 2021*
Research Fellow at The Fatima Al-Fihri Predoctoral Fellowship

- Worked on automatic annotation of 3D genomic datasets using self-supervised deep learning approaches & conducted comparative study with different clustering techniques including K-means and DBSCAN on HiC features.

Robi Axiata Limited, Dhaka, Bangladesh *July 2020 - February 2022*
Data Science & Machine Learning Engineer

- Developed a complaint-classifier ML model using a feed-forward neural network MLP with ReLU and Softmax layers, handling training, validation, and deployment to resolve customer complaints with zero human intervention.
- Built linear regression-based predictive model for suggesting suitable offers to the customers (like recharge, data pack, etc.) development, training, & validation.

Abelling, Dhaka, Bangladesh *June 2020 - July 2020*
Machine Learning Intern

- Creating documentation for ML products and reviewing AI-assisted data labeling APIs & Abelling client data analysis by applying statistical analysis.

IN-PROGRESS PAPERS & PATENT

- **U.S. Provisional Patent** Application No. 63/665,243 **Incorporating Personality Traits to Digitally Phenotype Mental Health** Inventors: **O.B. Amin**, A. Sathyanarayana, V. Mishra NU Reference No.: INV-24121 Status: Filed, Pending
- **O.B. Amin**, V. Mishra, H.Saksono, R. Ghosal, and A. Sathyanarayana, ***"Predicting Recovery Time from In-Lab Stressors using Digital Phenotyping,"*** submitted to ICHI'26
- V. Singh, N. Miner, Y.R. Vutukoori, **O.B. Amin**, M. Chiu, C. Myers, C. Harteveld, R. Lohre, C. Bono, and A. Sathyanarayana, ***"Automated Functional Assessment of Shoulder Pathologies Using Machine Learning and Extended Reality,"*** submitted in npj Digital Medicine

RECENT PUBLICATIONS & PRESENTATIONS

Google Scholar Profile

- A. Sathyanarayana*, **O.B. Amin***, J. An, and J.-P. Onnela, ***"Examining the use of consumer wearable devices and digital tools for stress measurement in college students: a scoping review of methods,"*** has been accepted for publication in JMIR mHealth and uHealth
- **O.B. Amin**, T.M. Tapera, R. Volpe, V. Mishra, and A. Sathyanarayana ***"Extending Stress Detection Reproducibility to Consumer Wearable Sensors,"*** in 2025 47th International Conference of the IEEE Engineering in Medicine and Biology Society (EMBC) **IEEE**, 2025. [Paper Link]

SKILLS

Language	Python, C, C++, R, Shell, Swift, SQL, Java
Frameworks/Tools	TensorFlow, PyTorch, Keras, Scikit-learn, PySpark, Pandas, NumPy, Matplotlib Oracle DBMS, MySQL, PyMongo, StatsModels, DEAP, Streamlit, Flask, Odoo, SkFuzzy, MATLAB Fuzzy Toolbox, KML, KML3D (R), OpenAI API
Domain	Machine Learning, Deep Learning, Digital Phenotyping, Digital Biomarkers, Mobile Sensing, Signal Processing, Data Science, Natural Language Processing, Human Computer Interaction
Wearable/Medical Devices	Empatica E4, Garmin, Polar Chest Straps, Biopac MP160 System

AWARDS & ACHIEVEMENTS

- **SRS Diversity Membership Award 2023 – Sleep Research Society**
- **Start-Up Fund Recipient – Northeastern University, Khoury College of Computer Sciences**
- **Selected Research Fellow – The Fatima Al-Fihri Predoctoral Fellowship 2021**
